EXPERIENCE

JC Software Solutions Pvt. Ltd. | Mohali, India (On-site)
 May 2024 - July 2024

- Developed scalable and interactive web applications using React.js and modern front-end technologies.
- Designed and optimized responsive UI components with Redux for state management.
- Ensured cross-browser compatibility, API integration, and performance efficiency.
- Conducted code reviews, debugging, and best practice implementation to enhance code quality.

Skills and Expertise

- Programming Languages: C, C++, Python, Java (Basics)
- Frameworks & Libraries: React.js, Next.js, Spring Boot, Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, HTML, CSS, MySQL
- Tools & Platforms: Visual Studio Code, Jupyter Notebook, Git, GitHub, Object-Oriented Programming (OOP), Data Structures & Algorithms (DSA), REST APIs, PowerBI

Projects

E-Commerce App Tools: React.js, HTML, CSS • Built a responsive, dynamic e-commerce platform to enhance online shopping experiences. • Implemented real-time product catalog, cart management, and secure user authentication. • Optimized performance and UI/UX, ensuring seamless cross-device compatibility.	(Self-Project)  June 2024
Broodle (Mood Tracker) Tools: Next.js, CSS, Firebase • Developed a real-time mood tracking app to help users log, analyze, and reflect on emotional patterns. • Integrated Firebase authentication & database for seamless real-time storage and accessibility. • Designed an interactive, visually engaging UI for intuitive user experience across devices.	(Self-Project)  Sept 2024
AI-Powered Finance Manager Tools: React.js, Flask, PostgreSQL, OpenAI API, Firebase • Created an AI-driven finance management system for automated expense tracking and budgeting. • Integrated OpenAI API for AI-powered financial insights & automated categorization. • Designed a data-driven dashboard with Chart.js & D3.js for intuitive expense visualization. • Implemented secure authentication (Firebase) and payment integration (Stripe & PayPal) for real-world usability.	(Self-Project)  Jan 2025
